PRAVANJAN ROUL

Java Backend Developer

Bhubaneswar, Odisha, India | +91-8984882166 | pravanjanroul6@gmail.com
linkedin.com/in/pravanjan-roul-6543a7302 | github.com/Pravanjan2004

Professional Summary

Java Backend Developer with 2 internships and hands-on project experience building database-driven REST APIs with Java 21, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, and PostgreSQL/MySQL. Strong in OOP, data structures and algorithms, layered architecture, and DTO-based API design. Building a logistics order-management backend and expanding into Spring Security, OAuth2, Redis, and Kafka. B.Tech CSE (CGPA 9.0) seeking an entry-level Java Backend Developer role.

Technical Skills

Languages: Java, SQL, Python
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JDBC, REST APIs, DTOs, Bean Validation, Lombok
Databases: MySQL, PostgreSQL, Relational Database Design, CRUD
Tools & DevOps: Git, GitHub, Maven, Postman, IntelliJ IDEA, Eclipse, VS Code
Core Concepts: Object-Oriented Programming, Data Structures and Algorithms, Java Collections, MVC Architecture, Layered Architecture, Entity Relationships, Business Rule Validation, Debugging
Currently Learning: Spring Security, OAuth2/OIDC, Redis, Apache Kafka, Docker

Experience

Java Development Intern – Cognifyz Technologies — Oct 2025 – Nov 2025

Remote

- Implemented backend features for live project modules using Java, Spring Boot, and REST APIs during a 2-month internship.
- Integrated login and data-handling APIs, reducing testing delays for the team.
- Wrote reusable Java code following OOP principles and tracked changes with Git and GitHub.
- Resolved defects in existing modules, improving application stability and reducing errors.

Java Developer Intern – Infotact Solutions — Feb 2025 – Apr 2026

Remote

- Delivered Java modules for web applications over a 14-month internship, applying Core Java, OOP, and Spring Boot.
- Designed RESTful APIs and connected backend services to application workflows.
- Optimized and debugged existing code, reducing runtime issues and improving performance.
- Collaborated with a team through Git and GitHub pull-based workflows.

Projects

Smart Delivery Order Management System — GitHub

Java 21, Spring Boot, Spring Data JPA, Hibernate, PostgreSQL, Maven, Lombok, Postman | In active development

- Engineered a Spring Boot logistics backend that manages a 7-stage delivery lifecycle (CREATED to DELIVERED), with status transitions validated in the service layer.
- Built REST APIs across 3 modules (Customer, DeliveryOrder, DeliveryPartner) covering create, retrieve, status update, and agent assignment, using Spring MVC, DTOs, and Bean Validation.
- Modeled 3 core entities with one-to-many and many-to-one JPA/Hibernate relationships on PostgreSQL.
- Designing capacity-aware assignment: Java rules reject vehicles whose weight capacity is below the package weight (for example, a 25 kg TV on a 10 kg EV bike) before an agent is selected.
- Verified endpoints with Postman and versioned work through incremental GitHub commits. Roadmap: Spring Security/OAuth2, Redis, Kafka, Razorpay, React.

Banking System — GitHub

Core Java, OOP, JDBC, MySQL

- Created a banking application with 6+ operations, including deposit, withdrawal, and balance management.
- Integrated MySQL through JDBC to manage 120+ test records with consistent CRUD operations.
- Implemented transaction logic using Java Collections and object-oriented design.

Education

Bachelor of Technology in Computer Science and Engineering — Present

Centurion University of Technology and Management, Jatni, Khurda, Odisha — CGPA: 9.0 / 10

Higher Secondary Education (Class XII) — 2021 – 2023

Siddhi Vinayak Higher Secondary School — CGPA: 8.95 / 10

Certifications

- **Java Programming Course** – GeeksforGeeks
- **Data Structures and Algorithms Course** – GeeksforGeeks
- **Generative AI** – Infosys Springboard
